## INTRODUCTION

Hello there! I'm a budding Python developer with a unique background in psychology. While my journey may have started in the world of human behavior and cognition, my passion for technology led me down an exciting new path into the realm of software development.

## PROJECTS

### Ecommerce web app

I have developed a comprehensive Ecommerce web application using Python Django and MySQL, equipped with essential CRUD (Create, Read, Update, Delete) functionalities from the user side. This project encompasses a user-friendly interface allowing seamless navigation and efficient product management
